# Amdocs Networks Division

One storefront that brings together disparate network assets

One network story showing end-to-end solution value with partners

A Network Business Unit focused on addressing multi-domain network complexities

Positioning as telco to techco transformation enabler

Mission of Org – extend on our Network credentials - **Combine the in-depth knowledge across multiple domains and partners** to create holistic solutions addressing key pain points.

*It is not the strongest of the species that survives, nor the most intelligent that survives. It is the one that is most adaptable to change.*

# Amdocs – Core Network Competencies

**Amdocs Networks offers “asset backed” network solutions and services division.** Building on a great legacy in IT domain, we have over 15 years evolved deep network expertise. We believe our differences are:

1

Service/Network  
Orchestration &  
Automation

2

5G SA Network  
Functions (CHF,  
PCF/BSF, Slicing...)

3

End-to-end  
network  
monetization

4

Network Core and  
RAN management  
and optimization

5

Proven Expertise in  
Telco cloud  
evolution and  
operations mgt

6

Proven Expertise in  
Private Enterprise  
Network  
Acceleration

7

Ecosystem centric,  
OEM agnostic, with  
wide third-party  
experience and  
relationships

8

Large investments in  
cloud, security,  
assurance in  
product & processes

A hand is reaching out towards the camera, with the index and middle fingers extended. In the background, a blue car is visible on a road. The image is slightly blurred, suggesting motion or a shallow depth of field.

# The Complexity of Private Networks

## DESIGN/ PLANNING

Use case requirements  
(coverage, capacity, costs)

## NETWORK PRODUCTS

RAN, Core, MEC, Analytics  
Devices (CPE/EUD)

## E2E SYSTEM INTEGRATION/ ROLLOUT

Integrating RAN, Core, MEC, DAS,  
Transport, ISV partner

## SPECTRUM

Licensed/Unlicensed  
Spectrum

## NETWORK/ SERVICE OPS

Consumer, M2M Integrations

## SIM/DEVICE MANAGEMENT

NOC, Tier 1/2 Support, Assurance

*Leveraging Amdocs Radio, 5G Solutions and Services expertise*

# Not All Enterprise needs are the Same

Curated blueprints based on diverse enterprise requirements

## UNIVERSITIES/Schools

### USE CASES:

Fixed wireless broadband  
Reliable & secure alternative  
to enterprise Wi-Fi

## IR4.0

### USE CASES:

Augmented Reality (AR),  
Advanced Robotics, Internet Of  
Things (IOT) etc

## SmartCity/UTILITIES

### USE CASES:

Smart metering aggregation  
Distribution automation  
Network management

# Complexity in Design

# Transformation Shift in Business Model of CSPs

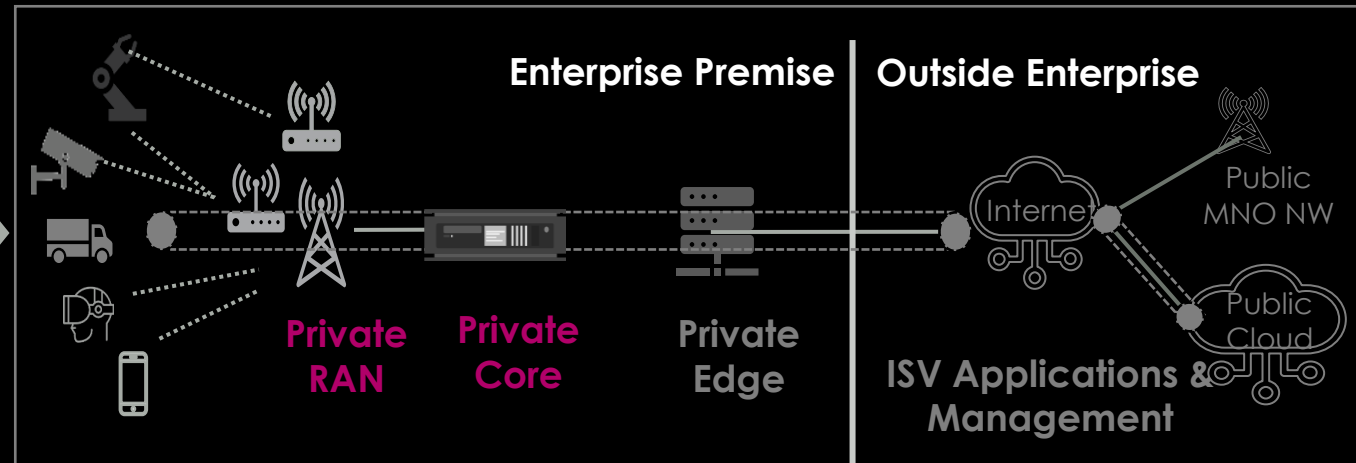

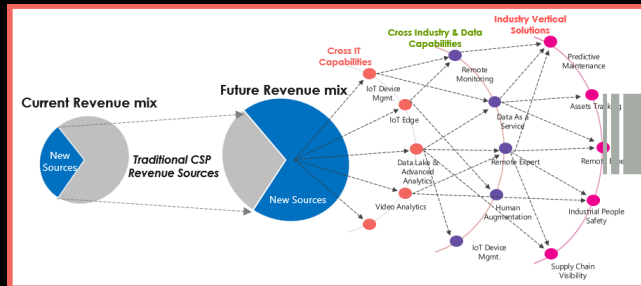

Increasing focus on delivering **Digital Enterprise Services** beyond Connectivity

# Why are Cellular Private Networks relevant

Together with other connectivity solutions (e.g. Wi-Fi, Ethernet, LPWAN, etc), Private Networks are the **foundations** upon which Enterprises build their **digital transformations**.

Private Networks play a **key role** in **enabling** some the most **innovative use cases** (e.g. Collaborative Worker, AGVs etc.) where cellular connectivity works best.

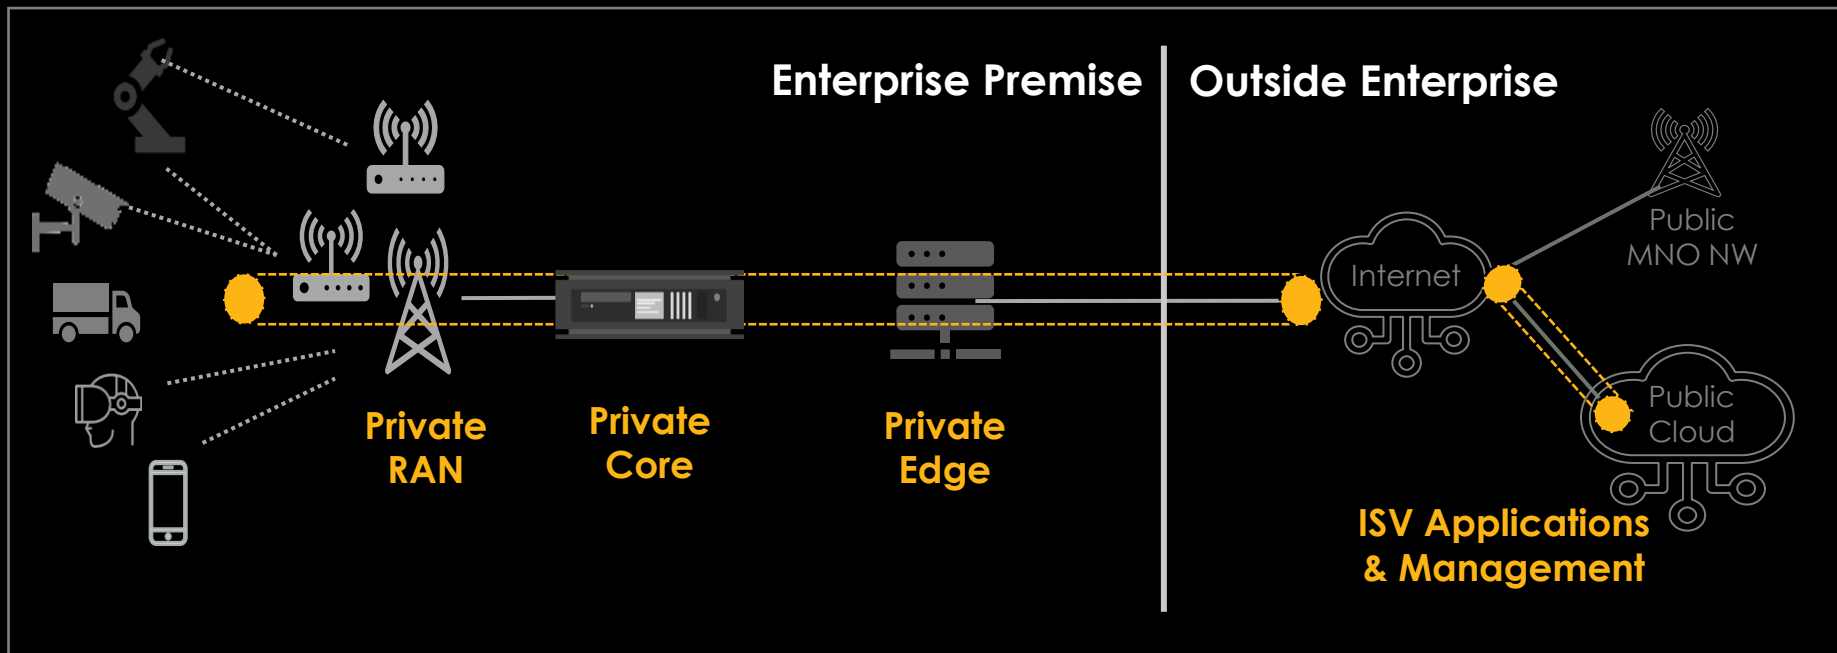

# How we can help..

From PEN, MEC to Smart Cities....

# Where can we help you

Amdocs and our Partners bring together the private network, edge, cloud, apps, security and services that enable SPs to deploy and operate enterprise digital solutions at scale and monetise more than connectivity

**End to end  
Services**

**End to End  
Security**

# Our Assets

## Core & Network Analytics

- Policy/Charging/Slice & Analytics NW functions

## Management Platforms

- Operations dashboards and PEN360

## Services

- E2E Design, Deploy, Operate
- Systems Integration + Program Management
- Operations, NetOps, Monitoring, AiOPS

Partners

## Core

- Core (multi-partner core)

## Edge

- Intel, Dell, ASE

## ISV ecosystem

- ISV ecosystem
- Enterprise Playbooks and Knowledge
- Labs (ISV, Devices, UE, etc)

## RAN

- Samsung, Nokia, Airspan, Ruckus etc.

## Security

- Allot, PaloAlto, F5

# Howard University- Private Network in 3 weeks

September 3

- HU got to know they are under attack
- Amdocs gets call to build a CBRS PEN

September 7

- HU attack publicly announced
- IBM shows up on site to investigate
- All classes cancelled and students without internet
- Amdocs completes secure solution architecture

September 9

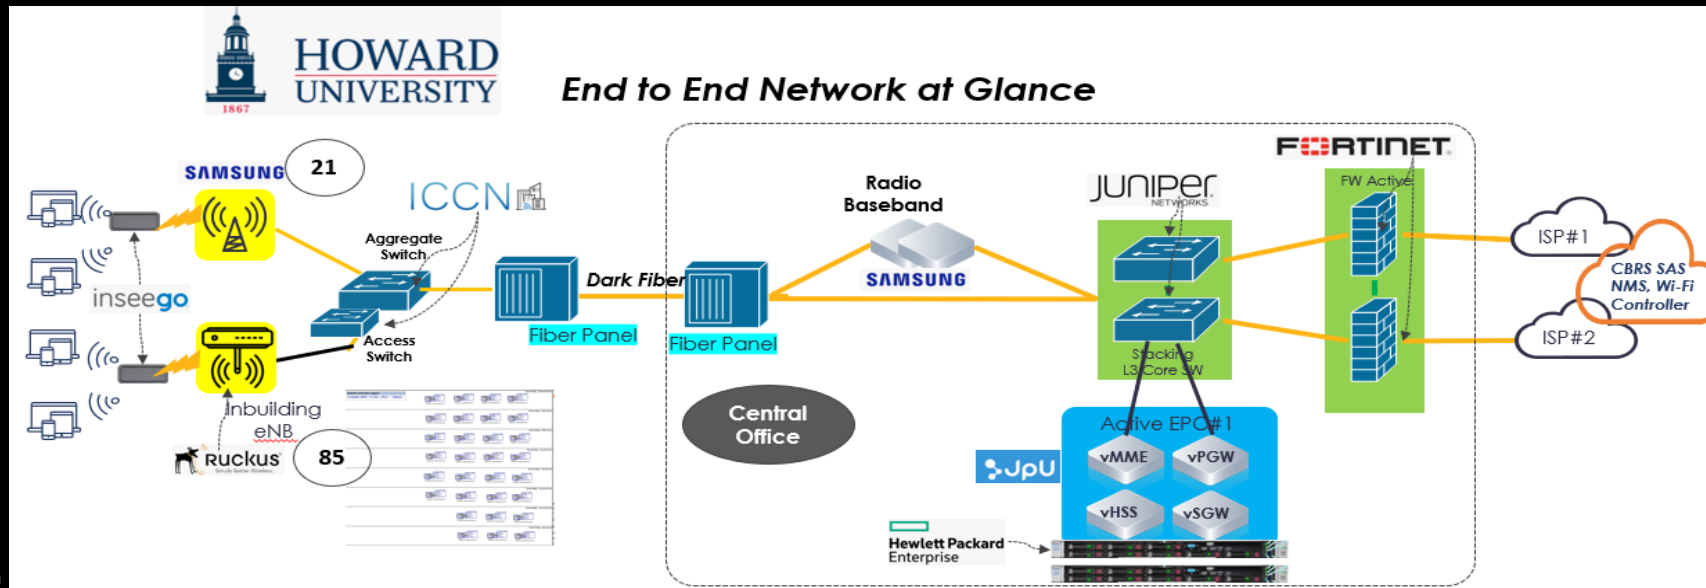

- Equipment ordered and work starts
- RAN, Core, Transport & Security part of service
- 1000 users to be served

September 23

- 2 buildings with 85 units completed
- Data and call tests complete
- Security hardening with firewall & VLAN's done
- HU wants CBRS to be redundant to Wi-Fi

September 28

- Live demo with CIO & team successful
- More HBCU campuses to be signed up
- All HU buildings to get CBRS PEN
- PEN is 5X faster than Wi-Fi
- HU sees a very secure E2E network and wants to order for all students

[illegible]

A close-up photograph of a hand reaching out towards the camera. The hand is positioned with the index finger extended. A yellow dashed line is drawn over the image, starting from the top right and curving towards the hand, possibly indicating a trajectory or a point of interest. The background is blurred, showing a white surface with some green specks and a blue object.

# Our investment in an e2e ecosystem

## Immense open ecosystem

- Reseller agreements with multiple hardware and software vendors
- Use case driven solutions tailored for different private networks
- Leveraging existing partner with Amdocs network capabilities to bring complete solutions to private networks

## Proven Private Network Experience

- Deployed several PEN directly to enterprise customers in different industry verticals
- Active member of TIP since 2016 for 5G open innovation lab with successful private network agriculture use case
- Solution for both service providers and enterprise customers

## Cross domain & functional expertise

- RAN, transport, core, and Internet consultancy services for PEN customers
- Network in a box model for enterprises (including HW/SW/services to deploy entire private networks)
- Automation and SW platforms to streamline process and speed up deployment

Firewall

# 5G Experience Innovation Lab

Amdocs sandbox where service providers and partners can **incubate new 5G solutions** and **accelerate commercialization** of those services.

## Live 5G SA Network(s)

*Built with an ecosystem of diverse partners*

## Enterprise-driven Use Cases

*Field tech support, AI-enhanced commerce, smart industry*

## Edge Applications

*Distributed architecture, edge tuned, cloud core*

## Innovation Incubation

*Use cases built based on customer priority & participation*

## Proven 5G Blueprints and Use Case Factory

*Telcos, universities, school districts, utilities*

70+ start-ups, 3 cohorts/year

# Q&A

Let's  
**make it**  
**amazing**
